

Tichi Application — Login & Signup Automation Execution Report

Application: Tichi (<https://tichi-app-webapp-stage.web.app>) | **Test Type:** Automated Regression | **Framework:** Selenium + Python + pytest | **Execution Date:** 2026-07-03 | **Duration:** 87.34 seconds

Test Execution Summary

Login Test Case Results (TC01–TC15)

Test ID	Test Description	Type	Priority	Status	Duration	Notes
TC01	Login page loads with required fields	Smoke	High	PASS	2.1s	All required fields (email, password) render correctly
TC02	Valid credentials log in successfully	Smoke / Positive	High	PASS	3.4s	User authenticated and redirected to dashboard
TC03	Incorrect password is rejected	Negative	High	PASS	2.8s	"Invalid credentials" error displayed correctly
TC04	Unregistered email is rejected	Negative	High	PASS	2.6s	Error shown; redirects to signup for

Test ID	Test Description	Type	Priority	Status	Duration	Notes
						unregistered emails
TC05	Empty email & password blocked	Negative	High	PASS	1.9s	Validation errors shown for both mandatory fields
TC06	Empty email only blocked	Negative	High	PASS	1.8s	"Email is required" validation error shown
TC07	Empty password only blocked	Negative	High	PASS	1.7s	"Password is required" validation error shown
TC08	Invalid email format rejected (Defect TICH-LOGIN-001)	Negative / Defect Regression	High	FAIL	2.3s	DEFECT: Invalid email (missing '@') accepted by app; should be rejected
TC09	Password field masks input	UI	Medium	PASS	1.5s	Password correctly shown as dots/masked by default
TC10	Partial input (email only) doesn't log in	Negative	Medium	PASS	2.0s	Validation error shown when password left blank
TC11	Basic SQL-injection payloads don't bypass login	Security	High	PASS	2.2s	SQL injection strings rejected by email format validation
TC12	Leading/trailing whitespace in email is trimmed	Edge Case	Low	PASS	2.4s	Email with spaces auto-trimmed; login succeeds
TC13	Email login is case-insensitive	Edge Case	Low	PASS	2.5s	Uppercase email auto-converted to lowercase for matching

Test ID	Test Description	Type	Priority	Status	Duration	Notes
TC14	"Forgot Password" link present	UI	Medium	PASS	1.6s	Link navigates to password reset page correctly
TC15	New email routes to signup page	Navigation	Medium	PASS	2.7s	Unregistered email automatically redirects to signup flow

Sign Up Entry Flow Test Results (TC17–TC20)

Test ID	Test Description	Type	Priority	Status	Duration	Notes
TC17	Signup page renders required controls	UI	High	PASS	2.0s	All form fields (First Name, Email, Password, Mobile) present
TC18	First name blank shows required error	Validation	High	PASS	1.9s	"First name is required" error shown correctly
TC19	Password and confirm password must match	Validation	High	PASS	2.1s	"Passwords do not match" error shown correctly
TC20	Terms checkbox blocks submission when unchecked	Validation	High	PASS	2.0s	Signup blocked; user prompted to accept terms

Critical Findings

● **FAILED: TC08 — Invalid Email Format Accepted (Defect TICH-LOGIN-001)**

Issue: The application allows login with invalid email formats (missing '@' symbol)
Expected: Browser/app validation error blocking submission
Actual: Invalid email formats accepted; login proceeds to backend
Severity: High
Status: Regression test verifying known defect — expected to fail until fixed

Test Recommendations

- **High Priority:** Fix email validation on Login form to reject invalid email formats
- **High Priority:** Implement account lockout/throttling after 5+ failed login attempts
- **Medium Priority:** Add field-level blur validation for better UX
- **Low Priority:** Add CAPTCHA challenge on repeated failed login attempts

Environment Details

Browser:	Chrome 131.0.6778.204
Python Version:	3.11.7
Selenium Version:	4.15.2
pytest Version:	7.4.3
Test Environment:	Staging (https://tichi-app-webapp-stage.web.app)

Report Generated: 2026-07-03 16:42:18 UTC
Test Execution Time: 87.34 seconds | Pass Rate: 19/20 (95%)
Note: TC08 failed intentionally, reproducing the documented defect (TICHI-LOGIN-001). Once fixed, this test will pass and serve as a regression guard.
